

# Our goal is as basic as it is bold: Smarter energy use for all

Elevate Energy's multidisciplinary team designs and implements programs that lower costs, protect the environment, and ensure the benefits of clean and efficient energy use reach those who need them most. We put our strong research and evaluation capabilities to work to maximize our impact and produce impressive results. Here's how we help:

## Building owners and managers

Building owners and managers can rely on Elevate Energy to help them navigate the complex process of completing energy efficiency upgrades and ensuring long-term savings for their properties. We offer energy and water assessments, guidance on selecting cost-effective improvements, construction oversight, and quality assurance. We find the best financial package for building owners, locating and applying for rebates, incentives, and grants on their behalf.

## Contractors

Elevate Energy connects local contractors with customers who are seeking energy efficiency services. We also provide training opportunities to help contractors expand their energy efficiency knowledge and work toward valuable certifications.

## Organizations

Elevate Energy partners with nonprofit organizations, childcare centers, and houses of worship to cut utility and maintenance costs. We help organizations improve their facilities and operations in order to maximize energy and water efficiency. This results in lower operating costs, freeing up funds that can be put toward the organization's mission.

## Homeowners

Elevate Energy connects households to the information and financial resources they need to make energy-saving home improvements and manage utility costs. We also make sense of electricity rate options and help people understand how the smart grid benefits them.

## Public sector

Elevate Energy serves the public sector by helping communities across the country reach their energy efficiency and sustainability goals. We consult on program design, create plans to assess and manage future energy needs, and we offer implementation and evaluation services. Projects have included energy benchmarking in commercial and public buildings, regional energy-use analysis, and assistance in getting comprehensive energy efficiency programs off the ground across the United States.

## Utilities

Utilities look to Elevate Energy as a trusted partner in implementing energy efficiency and smart grid programs. In coordination with utility companies, we administer hourly and time-of-use electricity rates, provide smart grid education, and deliver energy efficiency services to communities that have traditionally been considered hard to reach.

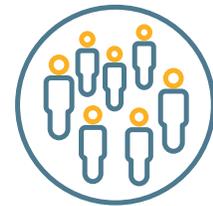

### SMARTER

We give people the resources they need to make informed energy choices.

### ENERGY USE

Getting energy use right saves money, increases comfort, creates jobs, and protects the environment.

### FOR ALL

We ensure the benefits of clean and energy efficient use reach those who need them most.

## Delivering results

People have great things to say about Elevate Energy.

“The Elevate Energy team members were very professional and easy to work with. It was stress free.” -**Jeff Cunningham, multifamily building owner**

“Elevate Energy was our knight in shining armor. They really made the lives of the women and children of our shelter more comfortable.” -**Angela Hicks, Executive Director of the Institute of Women Today**

“I will continue to say wonderful things about this program from Elevate Energy. The assistance we received through the entire process was fantastic. This program is especially valuable to families like mine who are trying to create a safe and affordable home.” -**Liz Vogel, homeowner**
