

# Elevate Energy Building Services

Are you motivated or required to meet “green” standards for your property? Do you want to better understand how your properties perform in order to set investment priorities? We offer custom energy and water efficiency services to support your property or portfolio at every stage. Please get in touch with us for a free consultation and customized proposal.

## Predevelopment: The Earlier the Better

We help you at the earliest stages of project planning to develop the best strategies to meet your goals, timeline, and budget, reduce the need for later changes, and maximize your long-term benefits. Just some of our services include:

- Rehab energy and water assessment
- Renewables or certification feasibility
- Design charrette facilitation

## Seamlessly Navigate Green Development

We know that the building design and development process is complex and fast-moving. When you factor in green measures, it gets even more complicated. Our building services will help you manage and implement the right energy and water efficiency systems, from design to construction.

- Design-spec review
- Energy modeling
- Green certification project management
- Commissioning

## Improve Building Performance for Comfort and Efficiency

Operating and maintaining properties for water and energy efficiency is critical to the long-term fitness of your property. It also leads to happier, more comfortable occupants and lower turnover.

- Benchmarking: portfolio services, ordinance compliance, and ENERGY STAR® certification
- Energy and water assessments
- Quality inspections
- Financing and utility rebate support

We've improved the performance of more than 35,000 units over the last decade. With Elevate Energy, you'll work with trusted building experts to meet your goals, not salespeople.

## Learn More

We'd like to hear more about your building plans and prepare a custom proposal for you. Please say hello today.
